Eppendorf Award Turns 25 Years

Hamburg, October 2019

2020 will see the prestigious Eppendorf Award for Young European Investigators turn 25 years. This will be celebrated with an event welcoming back high-calibre Award Alumni to talk about their science and careers: The **Young European Investigators Conference** held at the EMBL Advanced Training Centre in Heidelberg, on June 25, 2020. This free one-day conference is open to all scientists in biomedical research. The scientific program is organized by former winners Simon Boulton (The Francis Crick Institute, United Kingdom) and Óscar Fernández-Capetillo (CNIO, Spain & Karolinska Institute, Sweden). The event includes networking coffee breaks and lunch and a gala buffet in the evening. It will be rounded off with a talk from the newly minted 2020 Award winner.

Jury Chairman Reinhard Jahn: "I am really excited about the meeting which shows that the science done by previous winners of the EYIA is indeed outstanding!"

Further information and registration details are available at www.eppendorf.com/award/25years

Call for Entries for the Eppendorf Award 2020

The Eppendorf Award for Young European Investigators, endowed with 20,000 EUR, is granted annually to an early career scientist in Europe for outstanding contributions to biomedical research. It has been awarded, in partnership with *Nature*, since 1995.

To become the 25th winner of the Eppendorf Award, researchers in Europe up to 35 years with an advanced degree in the field of biomedical research can apply online between October 1, 2019, and January 15, 2020, at www.eppendorf.com/award/application

The winner is selected by an independent expert committee chaired by Reinhard Jahn (Max Planck Institute for Biophysical Chemistry, Göttingen, Germany). Full details on the Eppendorf Award for Young European Investigators, the selection criteria, and previous winners can be found at www.eppendorf.com/award

About Eppendorf:

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microplates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has more than 3,100 employees worldwide. The company has subsidiaries in 26 countries and is represented in all other markets by distributors.
