Eppendorf CryoCube® F440 ULT freezers now all-green

Hamburg, July 2021

Eppendorf continues to follow the path of sustainability by re-designing the 400 L ULT freezer class. The well-known standard-sized ultra-low temperature (ULT) freezer is now completely equipped with future-proof green cooling liquids and green insulation foam as well as better performance.

By combining longevity and quality with sustainability aspects, the CryoCube F440 series is the well-accepted standard format ULT freezer for the lab. 440 L of -80°C can be filled with up to 320 freezer storage boxes.

Low energy consumption of down to 6,8 kWh/ day (-80 °C; 230 V) is combined with powerful pull-down to -80 °C within 200 min and fast recovery back to -80 °C after door opening: The perfect solution for freezers which are used in the lab on daily basis – keep valuable samples safe at constant conditions.

Compared to its precursor, the CryoCube F440 saves up to 23% of power combined with 30% more space.

This is a further building block in a long green Eppendorf freezer story. Eppendorf now has more than 13 years of experience in research and development, production, logistics, and service in the field of green ULT freezers, compliant to F-gas regulation and SNAP.

The new CryoCube F440 series can be connected to VisioNize® Lab Suite for monitoring via VisioNize box. The eLabInventory sample management software can support the smart Eppendorf storage solution of high-value samples.

About Eppendorf:

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO2 incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microplates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has about 4.500 employees worldwide. The company has subsidiaries in 26 countries and is represented in all other markets by distributors.
