Eppendorf Introduces Multipurpose Centrifuge 5910 Ri to Accelerate Results

Hamburg, April 2021

Leading life science company Eppendorf introduced a new centrifuge designed to increase efficiency in the laboratory, Centrifuge 5910 Ri. The new centrifuge is the successor to the popular Centrifuge 5910 R, the flagship of Eppendorf multipurpose centrifuge portfolio that has been providing customers worldwide with outstanding versatility and ease of use since its launch in 2018.

With the introduction of Centrifuge 5910 Ri, Eppendorf now offers scientists advanced features to simplify and accelerate the centrifugation steps of their workflow. An innovative touchscreen interface allows for quick setting of desired parameters while three levels of user management and new documentation options provide enhanced security and traceability. The optional connection to the new VisioNize® Digital Lab Suite enables remote monitoring of the device, notification of alarms and events, and convenient access to important documents such as certificates and operating manuals.

A large selection of rotors and adapters facilitates a wide range of applications, while the unique Universal rotor saves time by allowing the centrifugation of, for example, 50 mL conical tubes, plates and 250 mL bottles without the need to change the rotor, rotor buckets or adapters.

About Eppendorf:

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microplates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has about 4.500 employees worldwide. The company has subsidiaries in 26 countries and is represented in all other markets by distributors.
