

Press Release

Eppendorf – A New Spin on Centrifugation

Hamburg, March 2018

Eppendorf started off the year by introducing not one, but two new centrifuges: A generation change at the small 24-place benchtop centrifuges. In the segment of the large refrigerated benchtop centrifuges Eppendorf is expanding the product range with a particularly versatile, high-capacity variant.

The new Centrifuge 5425 holds up to 24 vessels with a volume of 1.5 or 2.0 mL. A new swing-out rotor for 96 PCR tubes broadens the spectrum of molecular applications. Harvesting bacteria and yeast cells is facilitated by a new fixed-angle rotor for 5 mL tubes. The Centrifuge 5425 replaces the legendary Centrifuge 5424; it scores with a whole string of improvements, the highlights of which include certified aerosol-tight Eppendorf QuickLock® rotor lids for simple and safe handling.

The new Centrifuge 5910 R convinces with its versatility and capacity. Cell harvests carried out in bottles up to 750 mL, large scale purification of DNA/RNA as well as Ficoll® gradients are just a few examples of the many areas of application that are served by this new centrifuge. The new universal adapters facilitate even quicker loading; using these new adapters, conical vessels of up to 50 mL, plates and 250 mL bottles may be centrifuged for the very first time without the need for changing rotor, rotor buckets or adapters.

About Eppendorf AG:

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microliter plates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has more than 3,000 employees worldwide. The company has subsidiaries in 26 countries and is represented in all other markets by distributors.
