

Press Release

The new 15 mL and 50 mL Eppendorf Conical Tubes - Protein LoBind and Amber

Hamburg, June 2018

The latest major innovation for the product is the introduction of these two Eppendorf Conical Tube versions.

The Protein LoBind Conical Tubes minimize the risk of non-specific protein and peptide samples sticking to the walls of the tubes. This ensures the best possible sample recovery, which is especially important when working with samples with low initial concentration.

The innovative material of the amber-colored Conical Tubes is highly transparent, while at the same time effectively protecting the sample from low-wavelength light. This way, the pipette tip immersion can be safely monitored during liquid transfer, which helps avoid cross-contamination.

About Eppendorf AG:

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microliter plates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has more than 3,100 employees worldwide. The company has subsidiaries in 26 countries and is represented in all other markets by distributors.
