

Press Release

The new Eppendorf Storage Boxes

Hamburg, January 2017

The introduction of this new product line offers a complete systems solution for the storage of laboratory samples. Using this comprehensive modular concept, the nine different box formats may be combined to provide optimum solutions to individual storage requirements. The outside dimensions of the boxes are compatible with common freezer rack systems. In addition, the different inner grid variants offer the perfect fit for all common vessel formats:cryogenic tubes (1 mL - 5 mL), micro test tubes (0.5 mL - 5 mL), conical tubes (15 mL and 50 mL) and other laboratory vessels.

This space-saving approach, combined with the alphanumeric laser labeling of each individual sample position, will optimize sample storage and archiving in laboratories.

About Eppendorf AG:

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microliter plates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has about 3,000 employees worldwide. The company has subsidiaries in 25 countries and is represented in all other markets by distributors.
