

## Press Release

# Eppendorf eLABInventory and eLABJournal software solutions now available

Hamburg, July 2018

As a further step towards a comprehensive sample management solution from Eppendorf, the two Eppendorf software products eLABInventory and eLABJournal are now available.

In addition to monitoring and management of devices from Eppendorf with the Eppendorf VisioNize system, the eLABInventory and eLABJournal software packages now complement sample storage by providing documentation and traceability of samples stored in the Eppendorf Freezer.

eLABInventory is the next generation of sample management – flexible, intuitive, easy-to-use and traceable. This solution improves quality and efficiency by replacing documentation spreadsheets or paper based lists of the lab inventory, allowing to focus on research. The safe and secured documentation in accordance with CFR 21 Part 11 is compliant to controlled environments. With the Electronic Lab Notebook (ELN) solution eLABJournal, researchers can further extend the digitalization of experiments and projects in the lab and benefit from a solution for traceability for all research data.

The eLABInventory and eLABJournal software applications are available as cloud-based applications and are accessible via desktop computer or mobile devices.

### **About Eppendorf AG:**

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid handling, sample handling, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO<sub>2</sub> incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microliter plates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Eppendorf products are most broadly used in academic and commercial research laboratories, e.g., in companies from the pharmaceutical and biotechnological as well as the chemical and food industries. They are also aimed at clinical and environmental analysis laboratories, forensics, and at industrial laboratories performing process analysis, production, and quality assurance.

Eppendorf was founded in Hamburg, Germany in 1945 and has more than 3,100 employees worldwide. The company has subsidiaries in 26 countries and is represented in all other markets by distributors.

### **About Bio-ITech B.V.:**

**Bio-ITech** is a Life Science IT company that provides software solutions to manage information in the workflow of laboratories worldwide. The Electronic Lab Notebook eLABJournal and the Inventory and Sample Tracking System eLABInventory are 21 CFR part 11 compliant and safeguard intellectual property with track-and-trace, versioning, and digital signatures. Software solutions are offered as fully managed hosting solutions in the cloud, private cloud or on-premises. From offices in the US (Boston, MA) and Europe (the Netherlands), we serve customers worldwide. Since March 2017, Eppendorf AG has been holding the majority of shares of Bio-ITech BV.
